Description	Conscious Discipline leads teachers, providers, schools and programs through a process that promotes permanent behavior changes in both children and teachers. The change is from a traditional compliance model of discipline to a relationship-based, community model. Conscious Discipline empowers teachers with the seven powers for self-control. These powers allow teachers to draw from within themselves to become pro-active instead of reactive to conflict moments. They create a peaceful inner state, from this state; the lens of perception is changed. This perceptual change then promotes behavioral changes within themselves and the children in their care.
